

CSS list-style-image Test Page

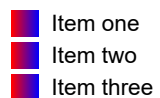

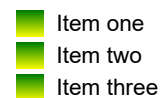

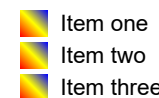

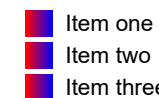

1 — URL image (graceful fallback when missing)

A missing URL should produce no marker and no crash. The list items are still indented normally.

 Item one Item two Item three	 • Item one • Item two • Item three	 • Item one • Item two • Item three	 1. Item one 2. Item two 3. Item three
missing URL	none (baseline)	disc (no image)	decimal (no image)
<code>list-style-image: url('nonexistent.png');</code>	<code>list-style-image: none;</code>	<code>list-style-type: disc;</code>	<code>list-style-type: decimal;</code>

2 — linear-gradient markers

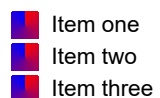

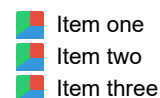

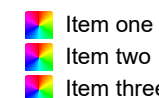

Each list item marker is a gradient-filled square, sized to the current font height.

 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three
to right red→blue	to bottom green→yellow	45deg multi-stop	hard-stop stripes
<code>list-style-image: linear-gradient(to right, red, blue);</code>	<code>list-style-image: linear-gradient(to bottom, green, yellow);</code>	<code>list-style-image: linear-gradient(45deg, red, yellow, blue);</code>	<code>list-style-image: linear-gradient(to right, red 50%, blue 50%);</code>

3 — radial-gradient markers

 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three
circle center	ellipse default	at 30% 30%	closest-side
<code>list-style-image: radial-gradient(circle, white, navy);</code>	<code>list-style-image: radial-gradient(red, blue);</code>	<code>list-style-image: radial-gradient(circle at 30% 30%, yellow, orange, red);</code>	<code>list-style-image: radial-gradient(closest-side circle at 50% 50%, lime, teal);</code>

4 — conic-gradient markers

 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three
default sweep	pie chart	from 90deg	color wheel
<code>list-style-image: conic-gradient(red, blue);</code>	<code>list-style-image: conic-gradient(#e74c3c 0 25%, #3498db 25% 65%, #2ecc71 65% 100%);</code>	<code>list-style-image: conic-gradient(from 90deg, red, yellow, blue);</code>	<code>list-style-image: conic-gradient(red, yellow, lime, cyan, blue, magenta, red);</code>

5 — list-style shorthand with gradient

A single list-style shorthand value setting both position and image.

 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three	 Item one Item two Item three
inside linear	inside radial	inside conic	outside linear
<code>list-style: inside linear-gradient(to right, purple, orange);</code>	<code>list-style: inside radial-gradient(circle, gold, crimson);</code>	<code>list-style: inside conic-gradient(red 0 33%, blue 33% 66%, green 66% 100%);</code>	<code>list-style: outside linear-gradient(45deg, teal, pink);</code>

6 — Gradient marker alongside typed bullets

Left column uses a gradient list-style-image; right uses list-style-type only. Neither should interfere.

-  Item one
-  Item two
-  Item three

gradient image

list-style-image: linear-gradient(to right, red, blue);

- Item one
- Item two
- Item three

disc (no image)

list-style-type: disc; list-style-image: none;

- o Item one
- o Item two
- o Item three

circle (no image)

list-style-type: circle; list-style-image: none;

- Item one
- Item two
- Item three

square (no image)

list-style-type: square; list-style-image: none;
